

“REGIONAL CLUSTER OF INNOVATION AND SUSTAINABILITY ”

 INNOVALL

● COMPANY PROFILE

Manufacturing, printing, manufacture and distribution of flexible packaging.

● CAPABILITIES

The aim of this company is to offer to its clients the highest quality standards achieved through the latest technology and the high motivation of the human resources.

The company manufactures "efficient" flexible packaging from the implemented technologies such as:

- SCANFRESH Technology: allows the permeability of the film and let the food to breathe but impeding them to oxidize too much.

- SCANBREEZE Technology: packaging for products that require maximum ventilation (such as potatoes or onions).
- Exclusive EFIFLEX printing system, that makes it possible to reproduce high quality images on a variety of media. This technique is the result of improved equipment and materials the use of CTP technology.
- FULL DIGITAL WORKFLOW Technology, which has made possible the management and automation of business processes.
- Pre-Printing System Integrated into the company.
