

“REGIONAL CLUSTER OF INNOVATION AND SUSTAINABILITY ”

INNOVALL

LIDEM®

COMPANY PROFILE

Designing and manufacturing of machinery for all types of industrial processes. Specialists in textile recycling plants and cutting machinery in various formats (rolls, linen, bullets and bundles) and all materials (textiles, fiberglass, plastics, waste, etc.

CAPABILITIES

To LIDEM, research and development are always a constant, having been awarded several times by the innovation of its systems. LIDEM offers versatile products in high yields, with total strength in the elements and ease of use. This allows us to offer a high return and quick payback from them. To do this, it is employed high quality materials to ensure the effectiveness and durability of its products.

It has an engineering department in which the design, simulation and study of the new products that LIDEM launches to the market are carried out. The strength of this design is that the company has the ability to offer increased productivity with minimal cost to the customer, both acquisition and maintenance (reduced downtime, longer wear items ...) and consumption.

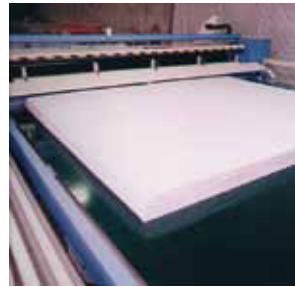

COMPANY STATEMENT

The Department of R&D + I is in constant contact with companies and specialized institutions to be informed of all developments and technological improvements in the world of machinery.

LIDEMA can meet business needs and processes, such as:

- CUTTING BOARDS
- TREATMENT AND RECYCLING
- CUTTING AND GRINDING
- FINISH
- FILL
- LOGISTICS AND PACKAGING
- SPINNING
- Nonwovens and GEOTEXTILES
- WAXES
