

“REGIONAL CLUSTER OF INNOVATION AND SUSTAINABILITY ”

 INNOVALL

 OLAX 22

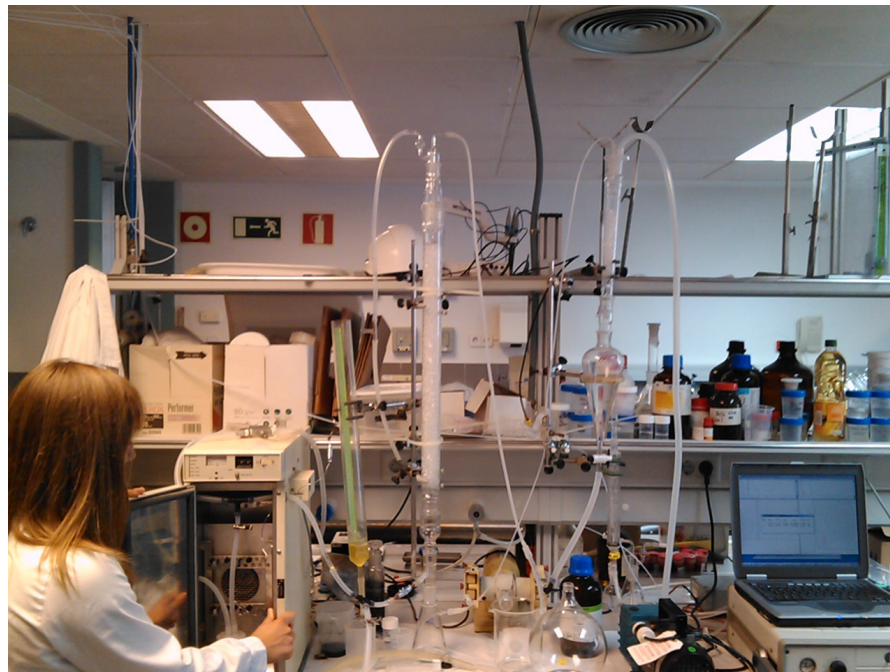

● COMPANY PROFILE

Olax22 is created with the aim of solving environmental problems in the printing industry and waste energy recovery coming from the food industry as well as sludge from wastewater treatment plants (EDAR).

● CAPABILITIES

Its aim is to offer to its clients the quality standards achieved through the latest technology and the high motivation of staff.

Olax22 aims to provide industry, through R & D, a viable solution to environmental problems. All carried out by the latest technology and long experience of its researchers in the field of waste recovery.

COMPANY STATEMENT

Projects available are:

- The recovery of the major components (paint, solvent and pigment) waste generated in the washing of flexographic printing machines.
- Collection and recovery of volatile organic compounds or VOCs from drying tunnels in the flexographic industry.
- The energy recovery of waste generated by the food industry, water treatment, etc., through the production of biofuels.
