COMPANY RESUME

The company PROTECTEL Gestión de Seguridad, S.A. specializes in the installation of all types of electronic security systems. Thus, it offers to its clients a comprehensive service quality in the field of security.

CAPABILITIES

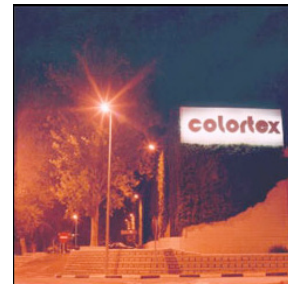

Protectel S.A. offers the design of each project, for which it has a widely skilled team of professionals in charge of design and project in any situation the best possible security system, always adapted to the specific needs of each customer.

Installed devices are connected to the Central Alarm Receptor, in order to inform to the state security forces about the different alarm signals (theft, bribery, robbery, fire etc.).

The company also has a department that offers specialized personnel to perform tasks in control and supervision within the facility.

To provide ongoing oversight of the state of the alarm system, the company employs the latest technology in transmission with the C.R.A, through TCP / IP or GPRS connection systems.

Following the introduction of increased solar production facilities, it has developed security systems that prevent those goods from sabotage and theft.
